

GOING DEEPER

ACTS Israel Tour 2018

JERUSALEM AND BETHANY

Bethany is on the east slope of the Mount of Olives. Note, also, that Bethany (300 meters above sea level) is much lower than Jerusalem (750 meters). When we travel from Jerusalem down to Jericho, Masada, and the Dead Sea you will see very clearly what that change in height means. You'll also think about Jesus and his disciples and say, "Hey, these guys must have been in pretty good shape to do all that hiking!"
